

Once upon a time...

The Story of PISA

Who is Pisa?

- Pisa is an engineer - geek - nerd
- Works for a small startup and loves Slack
- Company acquisition by larger multinational

Problem

Large company = Bureaucracy?

New timesheet system based on old technology

<t<IConstruction Lien Litigation Not Moot -- Property Remained in\
Property Owner's Possession:>>\
A District Court found for a\
property owner in a suit involving a construction lien, and it\
instructed the clerk and recorder to remove the lien from the\
property's public record. The property owners recorded the\
judgment, but on appeal, the Supreme Court reversed the judgment\
and remanded the case. The company holding the construction lien\
subsequently recorded a lis pendens on the real property, but the\
property owners closed on a refinancing loan after a deputy clerk\
erroneously filed a letter of release. On remand, the property\
owners argued that the lien was unenforceable because the\
District Court's judgment effectively discharged and released the\
lien. The Supreme Court found that even though the owners\
refinanced a loan on the property subject to the lien, it was\
never sold and remained in the property owner's possession, so\
the case was not rendered moot. The Supreme Court found that the\

Solution

- Build an API on top of the DB
- Connect with SLACK via REST
- Beginning of a larger HR system!
- **PISA**, Personnel Integration Slack Application was born

Design

Results and Future

- New DE-FACTO HR system. No need to decommission
- Integrated with all the organization
- Expandable
- Happier Personnel!

Questions and Answers

Thanks!
